

Risks

1. **(Environmental)** Fly health could decline in environment with temperature fluctuations
2. **(Resource)** There won't be enough space in the shed to install everything wanted/needed
3. **(Technical)** Extreme weather may damage outside equipment or solar installations
4. **(Technical)** Flies could escape and damage shed or inside equipment.
5. **(Technical)** Solar panels may not provide enough power during the day to maintain systems
