

Task/Idea	1	2	3	4	5	6	7	8	9	10
<b>Concrete Delivery</b>	Attach reservoir directly to extruder	Manually fill extruder	Gravity fed	Pump fed	Auger fed	Dosing pump	Open shoot to basket on extruder	Using a motorized plunger forcing the concrete into the extruder	Magnets	Using air pressure in the reservoir to push the concrete through the system
<b>Concrete Mixing</b>	In Auger	User mixed in the reservoir	In a purpose made concrete mixer (off the shelf)	User mixed in a bucket	Using an auger in the reservoir	Using a drill attached concrete mixer	In a concrete truck	A kitchen stand mixer	In a separate team design mixing apparatus	Using compressed air to agitate water and dry concrete together
