

## Customer Interview 1/28/2021 Summary

### Clarified/Additional Customer Requirements:

- No underground wires

- Aesthetic is maintained

- Scaleable past 20 torches either by linking more torches or daisy-chaining

### Resources Available i.e. Budget/samples/etc

- \$4000 components budget

- Sample Units available

- Existing Blueprints

### Methods of communication

- Email/zoom, “any hours” probably standard 9-5 business day

### Potential issues

- How to power electronic sensor without bulky solar panels breaking aesthetic?

- Measuring fuel in each torch (given design and available space for add-ons)(

- Ensuring fuel is distributed to all torches in series
