

Team: P21389 BugTorch Engineer: Jason Stiller

What were the outcomes of the prior phase?

1. What did I plan to do?
My plan for Phase 6 was to begin work on our final project paper and consult with Ben on the mechanical aspects of
2. What did I actually do?
I made substantial progress on the project paper layout and have begun filling in some of the contents.
3. What did I learn? How were plan and reality different?
I did not expect to be using the Overleaf program to write the project paper as was suggested by a team member, due to my lack of programming experience (even considering how basic Overleaf programming is) I will worry about that at the end and write out the contents in a Google Document.

Team level goal for next phase

The goal for Phase 7 will be to assemble a completed torch system and test the system with real citronella oil. The project paper will ideally be mostly outlined even if data and charts might be missing.

What do I plan on doing to ensure that my team has a successful review at the end of the next phase?

Topic	Estimated Time Requirement	Approximate due date
Continue work on paper	10 hours	October 25
Mechanical engineering consultation with Ben	5 hours	October 25
Coordination with Joe	4 hours	October 25
Confluence Maintenance	3 hours	October 25

What is standing in my way of meeting my next phase goals?

There are currently no obstructions to meeting these goals.
