

**Team:** \_\_\_\_P21389\_\_\_\_      **Engineer:** \_\_\_\_\_Owen\_Straub\_\_\_\_\_

**What were the outcomes of the prior phase?**

1. What did I plan to do?
  - a. Get a test bench together and attempt to have each subsystem in a working order.
2. What did I actually do?
  - a. I got a few of the systems working but some were neglected.
3. What did I learn? How were plan and reality different?
  - a. Life has had this funny way of making every assignment I have due at the same time, so it was hard to complete any goals.

**Team level goal for next phase**

Finish subsystems and integrate them into an initial full system.

**What do I plan on doing to ensure that my team has a successful review at the end of the next phase?**

I will hopefully be able to contribute to the last few subsystems and help with their integration.

**What is standing in my way of meeting my next phase goals?**

A workload so heavy it would make a body builder cry.
