Mission

Our mission is to foster research at RIT by partnering with researchers to support advanced research technology resources in computation, collaboration, and community building among RIT research faculty, staff and students. Our guiding principles are communication, collaboration, and service. We aim to know the researchers, their research, and their needs. We want to involve researchers in our planning process and communicate our capabilities and vision to researchers.

Goal

Our goals are to help researchers help themselves, collaborate on research projects, develop innovative technologies, provide core resources, and build a research user community.

Research Computing Staff

Emilio Del Plato	Sr. Systems Administrator / Engineer
Jennifer Herting	Systems Administrator
Paul Mezzanini	Sr. Systems Administrator / Engineer
Sid Pendelberry	Sr. Systems Administrator / Engineer

Research Computing Affiliates

Andy Elble	ITS - Network / Communications
Charles Gruener	Center for Advancing the Study of Cyber Infrastructure
Ed Huyer	Interactive Games and Media
Brett Matzke	College of Imaging Science
Ben Meyers	Center for Advancing the Study of Cyber Infrastructure
Bryan Meyers	College of Engineering
Jay Sullivan	College of Imaging Arts and Sciences
