

# Teacher Resources

## The Teachers Toolbox

This page is designed to provide information for teachers to access information on how to best work with students with disabilities in addition to deafness. The information within the wiki pages below provide resources, a toolbox of approaches, to help teachers understand the needs of the students they have with additional disabilities. The teachers toolbox also if full of teaching strategies that can be implemented into the classroom, accommodations, how student's disability affects their performance in the classroom, as well as other information that will aid in the classroom.

Before packing your toolbox with strategies, watch "[Fat City](#)", a workshop about how difficult the classroom environment can be for a child with a disability.

*\*The information within the wiki pages are still incomplete as of yet\**
