

# Do you have any book recommendations?

## Do you have any book recommendations? What are the best books on this topic?

Many courses provide optional reading or suggested reading in the course. Some examples are:

- In the **RITX Cybersecurity courses**, there is a section each week called "Additional Resources." This section has links to many resources to continue your learning.
- In the **RITX Project Management courses**, there is a list of recommended books and software on the "Helpful Resources" page in the Course Overview. These are optional items you may want to purchase for your own professional development outside of the course. There are also links throughout the course materials to free online articles to continue your learning.
- In the **RITX Soft Skills courses**, there are sections called "Supplemental Resources" and "Deep Dives" throughout the course materials. These sections have links to resources to continue your learning.
