

Filter all Meeting Requests and Updates to another folder

Microsoft Outlook

Start by opening Outlook. Click on **Rules** and then **Manage Rules & Alerts** on the **Home** ribbon.

Click on **New Rule**

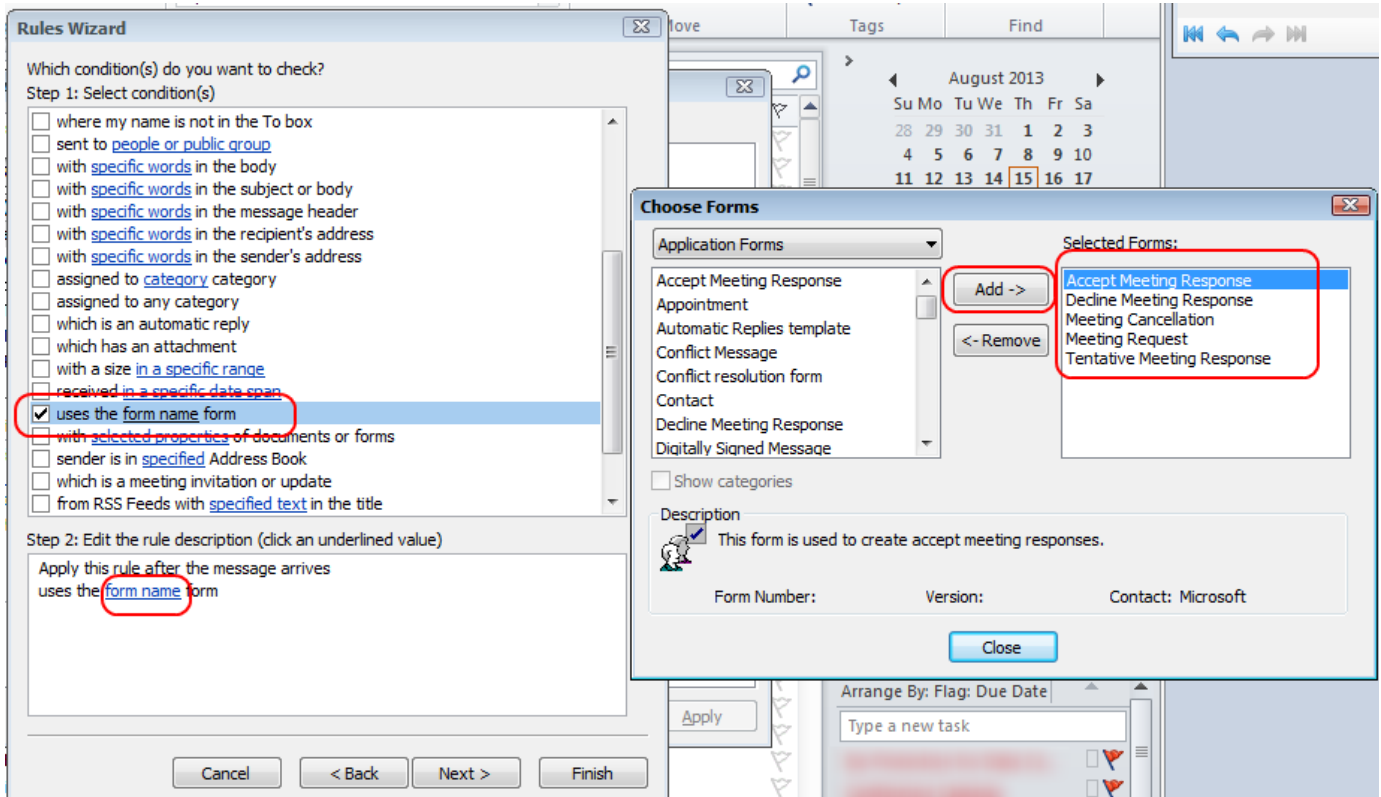

Click on **Apply rule on messages I receive** and then click **Next**.

Check **uses the form name form**, then click on the underlined words **form name**.

Select **Application Forms** from the drop down on the left-hand side.

Find **Accept Meeting Response**, **Decline Meeting Response**, **Meeting Cancellation**, **Meeting Request**, and **Tentative Meeting Response**. Use the **Add** button to move those forms to the **Selected Forms** list on the right-hand side. Once done, click **Close** then **Next**.

Check **move it to the specified folder**, click on **specified** and then select the location of where you want these types of messages to go to. Click **OK** and then **Next**.

Enter any exceptions if needed; otherwise, click **Next**.

Set a name for the rule and click **Finish**.

Rules Wizard

Finish rule setup.
