

The grade on my Progress page is showing as incorrect

The grade on my Progress page is showing as incorrect

Sometimes there is a short delay from when you finish a graded activity to when the grade is posted into your Progress page. Please refresh your browser or log off and log back in, and your Progress page should correctly show your score. If it does not, please wait 30-60 minutes and try to refresh your browser and check again. If you still believe your progress page is not correctly updated, please contact the course support team.
