

PE4400 Sputter

Facts

- The PE24400 stepper is a RF Sputter Tool.
 - Designed as a sputter down system.
 - It is a loadlocked system.
 - It has sputter etch capability for pre-cleaning substrates prior to sputter deposition.
 - Three 8" water cooled targets.
- The system has a large, flat platen that the samples simply rest on. It can accommodate many types of substrates.

Personnel

- Tool Engineer -
- Process Engineer - [Sean O'Brien](#)
