

Can I see answers to graded activities?

IMPORTANT

This question and answer only applies to the **Project Management** courses.

Why can't I see the Show Answer button? Can I see answers to graded activities?

In the **RITX Project Management courses**, the Show Answer button (ability to see the correct answer) is different for each type of graded activity:

- For **Quizzes**, the Show Answer button appears after you get the question correct or after you have used up all your attempts at a question. If you get an item incorrect on the first try and you have another attempt available, try again. If you use up all your attempts, you will be able to click the Show Answer button to see the correct answer. If you do not attempt the question, you will also be able to see the answer after the due date has passed (but cannot submit for grading).
- For **Assignments**, the Show Answer button appears after you have used up all your attempts at a question. Click the Show Answer button and view the correct answer.
- For the **Final Problem Sets**, the Show Answer will not be available. To ensure the integrity and validity of successfully earning a verified certificate for this course in pursuit of the Micro Masters in Project Management, we will not be sharing the answers to the final problem sets.
