

Portfolium Integration - Instructor Documentation

Portfolium is a new digital portfolio and career readiness network supported by RIT's Office of Career Services and Cooperative Education.

The use of third-party integrations in courses is at the discretion of the instructor with the understanding that many of these of these tools have support and documentation provided by their publisher, not RIT's Academic Technology Support. Most third-party integrations are not actively monitored RIT's Academic Technology Support and may be subject to unexpected changes or service interruptions from their publishers. Please refer to the documentation below for information specific to this integration.
